-Top nav bar and hero have shared video. Video provided in files. Video place holder used due to limits of my subscription to figma.

Notes:

-When a user hovers over reSide, about, or résumé links in home page an image over lay appears. All image files are in the files provided. (I created wireframes of what the pages will look like with the over

lays but I did not take the time to prototype that function-please ask questions if you have any) reSide link has the reSide logo appear. About link has sunrise group picture Résumé link has pink sparkles

-Images titled with GTKM belong on the about page under the get to know me header in the image block

Résumé

-For all of the following images when clicked on a larger image needs to open in a new window for better viewing. The flies will be after the following titles so you can find them more easily.

Assumption map Competitive analysis info-graph Interview insights affinity map info-graph

With this in mind Who are renters 1 persona

Who are renters 2 Dezo's journey What am I building 1

P it to the test 1, 2.1 & 2.2, 3.1 & 3.2

What am I building 2 Sketching my Ideas: low-fidelity, low fidelity desktop, mid-fidelity, mid-fidelity desktop, high fidelity,

This is a place holder image for the video titled project_page_final_product
